DCS ARMOR

TRUSTED OFFSITE DATA STORAGE

What DCS Armor Delivers...

Simple

Easy Installation – All software required for easy secure data backup is installed and configured in minutes. No additional hardware to install, maintain or learn how to use.

Back up from Anywhere – Secure backups can be accomplished from any Internet connection.

Anytime Access – Access to your stored data anytime, from any place, with an Internet connection. Recovery of lost files is fast and easy.

Minimum Effort, Minimum Time – Quick and easy backup is accomplished by only moving the changes you made to your protected data each time you back up.

Flexible Version Control - Provides unmatched flexibility in storing multiple versions of the same document. Definable down to the individual file. Easy to recover a previous version.

Safe

Secure Off-Site Storage – A redundant copy of all of your critical information is stored in our secure data center. If your system crashes or your laptop is stolen, your important information is still safe and easily restored at any time day or night.

No Hardware to Fail or Maintain – No bad media, broken tape drives, misplaced tapes or faulty CD drives. Your secure backup process is completely software driven and your backup is stored off-site without the hassle of putting tapes or CDs in another location.

Automated Processing - Be sure your data is being backed up correctly with our easy-to-use automated system. No operator error or forgotten backups. You even receive automatic reminders if you forget to back up your data.

Secure

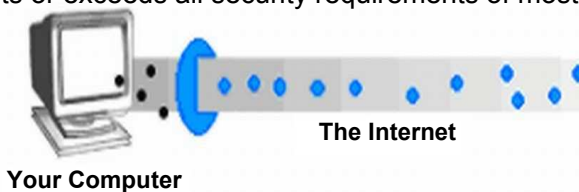

256-bit AES Encryption – All of your information is automatically encrypted based on your private pass phrase prior to being transmitted to our secure data center.

Only You Have Access – Without your pass phrase, the stored information cannot be read or used by anyone else including **DCS Armor** staff. Only you have access to your stored data.

Changes Only – Once your encrypted information is stored in our data center, only the encrypted changes to your data are transmitted to ensure the fastest performance. This process guarantees that the information sent is meaningless to anyone but you and your encrypted **DCS Armor Backup** account.

HIPAA and Sarbanes-Oxley Compliant – Meets or exceeds all security requirements of most major security guidelines and regulations.

**Back-up solution off-site
and out of region!**

 - Daily or weekly summary reports
 - Detailed list of URLs visited
 - Notifications by e-mail of inappropriate access
 - Logging of security violations

Easy to use online backups!

“DCS Netlink Business Themes for Customer Delight”

Dane Deutsch, CEO DCS Netlink

Leading Talents, Leading Teams- Author: Lee Ellis

Lee Ellis (USAF Colonel Retired), my Vice Commandant at the United States Air Force Squadron Leadership School, a Hanoi Hilton POW, and a very good friend of mine wrote: “The experts say it will be talents and teams that ensure economic viability in the increasingly competitive world economy.” Are you preparing your team to perform successfully in these challenging days of our lives?

In his book by the same title, Lee lays out what it means to align people, passions, and positions for Maximum Performance. He said in his book that he “tried to package the chapters so you can eat this elephant one bite at a time.” In the next few newsletters, I will be delivering short snippets of information from his 5 sections of the book: Talents, Specific Talents, Teamwork and Team Issues, Leadership, and Personal Growth/Development.

In Lee’s book, Section 1 starts out with the subject of “Talents.” Lee quotes Secretary of State General Colin Powell (former Chairman of the Joint Chiefs of Staff) who “highlighted the importance of talent to organizational success when he said, Organization doesn’t really accomplish anything. Plans don’t accomplish anything either. Theories of management don’t much matter. Endeavors succeed or fail because of people involved. Only by attracting the best people will you accomplish great deeds.”

Are you working to align your people, passions and positions for maximum performance? If you want to learn more about Lee and the Leading Talents, Leading Teams book, please visit <http://lmdc.dcsnetlink.com> and click on the book by the same name on the right hand side of the web page under “Featured Books.” Until next quarter, keep “Leading with Character First!”

New & Re-Designed Websites

Certified Soil Testing: www.certifiedsoiltesting.com

Tony Lumber: www.tonylumber.com

The quick, easy, and cost effective way to get your community online.

Easily Communicate with your Residents, Board Members, other Local Governments

Communication is key today. All local governments need to be able to pass information along instantly. A new DCS Our Town Website will allow you the instant communication you need.

Affordable

Everyone wants to make their dollars go further and do more. A well-planned website will help you save money and time. Needed documents will be available to everyone who needs them. No need to answer the phone, find the form, stuff it in the envelope, pay for the stamp, then have your resident wait a few days to get it.

Easy to Use and Update

The DCS Content Management System (DCSCMS) was developed with the goal that everyone would be able to maintain a sophisticated website with a lot of content with minimal effort.

No Special Software Needed

All you need to update your website is a computer with internet access. Updates are done through an internet browser such as Internet Explorer or FireFox. You simply log into the password protected maintenance area and easily start updating your site.

Completely Modular

Tired of wasting money paying for features you don't want and will never use? Our solution allows you to pay only for what you need.

Green Solution

A website will help your community be more earth friendly by using less paper and ink. Having FAQ's and Ordinances on the website pro-

DCS Netlink Chippewa Valley

Is there anyone out there reading our newsletter who has not heard about Wi-Fi connections? Perhaps there are a few. Most everyone is aware that there are such things as Wireless Access Points (WAP) but how

many folks have taken the time to consider security on their WAP?

By default when you setup a WAP, it generally has all of its possible security mechanisms disabled. They're there, but disabled. That's done strictly from a convenience standpoint. Often security isn't convenient, but it is still a requirement. If you personally or your company has a WAP, and you're not sure about the security settings, please give us a call and we can help you figure that out.

Mike Vaughn,
President
DCS Netlink
Chippewa Valley
