

DCS Netlink to host an Internet Security Seminar

DCS Netlink has partnered with Wisconsin Indianhead Technical College (WITC) and Chippewa Valley Technical College (CVTC) to host the annual InterSec 2009, Internet Security Conference.

Above: Attendees listen to a presentation at the 2008 InterSec Conference

InterSec 2009 will take place at the Wisconsin Indianhead Technical College Conference Center in Rice Lake, WI, on February 12 & 13, 2009 and at the Ramada Convention Center in Eau Claire, WI, on February 26 & 27, 2009.

The Internet has become integrated into nearly every aspect of our society. As technology grows, the Internet will also grow and the technologies that we will be using five years from now, we can hardly imagine today. While the Internet has allowed us to touch and talk to other people and computers throughout the world, it has also made our personal and business data, our infrastructure, local, regional, and national security all vulnerable to attack and destruction. **The key lesson learned is that those who rely on networked systems and the Internet must take proactive steps to identify and remedy their vulnerabilities, while at the same time continuing to do business on a day-to-day basis with all of its challenges (i.e.-budgets, risks, new/old threats, etc.).**

InterSec 2009 will focus primarily on “Securing Data in a Mobile World.” There will be two sets of conference tracks, the Indianhead Region (Rice Lake) and Chippewa Valley (Eau Claire). (See sidebar for details on the tracks.)

The seminars are designed to cover a broad range of mobility and Internet security topics, and challenges facing the government, business owners, managers, and IT personnel – “SECURITY IS EVERYBODY’S BUSINESS.” We have invited security and industry experts who will both speak and demonstrate how, in an ever-increasing mobile world, we can connect to networks and the Internet and keep data secure while doing business.

New Office to Open in Eau Claire, WI

DCS Netlink is proud to announce the opening of our Eau Claire office. We have located our new office in the historic Banbury Place building in downtown Eau Claire. We felt that it was important to locate our new office in the downtown area to make sure that we are able to fully engage with the heart of the Eau Claire commercial sector.

DCS Netlink has had a vision for many years now to open an office in Eau Claire to better serve our customers in that area. We felt that the timing was finally correct and that we needed to fully commit to the Eau Claire area to better serve the businesses there. We have already been serving numerous customers in the Eau Claire region for many years, but are planning that by having an Eau Claire office, we will increase that customer base many times over. We have always made sure to take care of customers in the best possible fashion. Whether we're installing new PC's and servers, designing websites, configuring firewalls, or assisting with planning the best way to incorporate that new software, DCS Netlink has always been committed to doing things in a manner that best serves the customer. We decided to open our new office in Eau Claire to further that commitment. By having a more centrally-located office, we will be able to respond to our customers needs in a faster, more efficient manner and take care of them better. That really cuts to the heart of DCS Netlink; we enjoy doing our jobs well and by doing our jobs well we allow our customers to do their jobs even better! We look forward to serving you better than ever before, and using our newest office location to help accomplish that goal.

Mike Vaughn
President, DCS Netlink,
Chippewa Valley
